

ECO Club plays an important role in creating environmental awareness amongst the future generation. ECO Club is a voluntary group, which promotes the participation of students in learning about, and improving their environment. People today, especially the young people, are concerned about the environment. An ECO club is a means by which students and youth can organize themselves to learn more about this issue, and take action to improve their immediate environment.

Objectives

ECO club activities can help the students to meet the objectives of Environmental Education, which are:

- To understand environment and environmental problems
- To motivate the students to keep their surroundings green and clean
- To spread awareness about environmental pollution and to prevent pollution in the college campus
- To prepare and organize students' participation for preservation and conservation of environment
- To promote ethos of conservation of water by optimizing the use of water
- To organize seminars, debates, lectures and expert talks on environmental issues

Activities

- Sensitizing the students to minimize the use of plastic bags
- Organizing tree plantation programmes and awareness programmes regarding environmental issues
- Educating students about re-use of waste material & preparation of products out of waste
- Organizing cleanliness activities both within and outside the college campus
- Maintenance the herbal garden in the campus
- Making arrangements to preserve the biodiversity of the campus
- Creating forums to discuss and deliberate on environmental issues
