

The Science Club functions with the aim of channelizing the energy of the students towards desirable goals. It promotes scientific interest through various tasks. It supplements the work of the classroom and helps to approach science on a practical basis.

Objectives of Science Club

- ❖ To inculcate scientific attitude in students
- ❖ To enable students to apply their knowledge of science in daily life
- ❖ To provide opportunities to students to participate in scientific competitions
- ❖ To arrange visits to industries, exhibitions and science centres in order to gain firsthand knowledge
- ❖ To make students aware of the modern developments and inventions and their impact on human life
- ❖ To collaborate with other organizations in science and gather scientific information

Activities organized by Science Club

- ❖ Organizing awareness programmes on issues related to science and life
- ❖ Organizing contests, Science exhibitions and quizzes
- ❖ Commemorating important World and National days
- ❖ Arranging visits to industries in and around Thoothukudi, District Science Centres and Science exhibitions to give direct firsthand experience
- ❖ Arranging National Webinars and online workshops for students and teachers on relevant themes
- ❖ Providing opportunities to students to attend training programmes in Science
- ❖ Providing opportunities and encouraging students to participate in contests, Science exhibitions and quizzes
