ACADEMIC COUNSELLING

The teachers of the institution use technology to stay connected with the students. Whatsapp offers an easy means of group communication and this is used by teachers to support teaching-learning. The teachers are also able to understand and know about the students better through the communication in the group. The teachers form whatsapp groups for the courses they teach. This helps them to share information, share e-resources for learning, post instructions for group work, provide clarifications on concepts, provide guidance for assignments/tasks and reinforce learning by sharing audio files. The whatsapp group was useful for remote learning during the times of close down of the institution due to pandemic. The group served as study circles with students and teachers sharing recorded explanation of concepts learnt. The group interactions were beneficial to both the slow and advanced learners. The students were able to view the resources and use them for learning at their own pace. The academic counselling through whatsapp complemented the real time learning during lectures.
